MEMORANDUM

To: Bev McKeone
From: Jerry Williams 
Date: May 30, 2017
Subject: PD17-028, Energy Corporation of America (083-00101) Ellamore Station

Energy Corporation of America (ECA) submitted PD17-028 on May 11, 2017. PD17-028 was submitted to request a determination to install a 0.5 MMBTU/hr boiler, 8.5 mmscfd glycol dehydration unit, 0.75 MMBTU/hr reboiler, and 630 gallon pipeline fluids tank. ECA is currently permitted for the glycol dehydration unit and reboiler under R13-2347, issued on October 29, 1999. The emissions from the 0.5 MMBTU/hr boiler and 630 gallon pipeline fluids tank do not meet the definition of a “modification” under 45CSR13.

Therefore, a permit is not required for the proposed changes based upon the submitted permit determination which indicates that the proposed changes are below the emission thresholds and does not trigger a substantive requirement of any State or Federal air quality regulation.
